

VISITING INFORMATION & GUIDELINES

COVID-19 visiting restrictions are in place for everyone's safety, but we know that it's important for our patients who need the support of their family.

To try to keep the number of people in our hospitals low, all visits to patients must be scheduled. Please keep your visit to your scheduled time.

When You Arrive

- Answer the active screening questions honestly and sign in
- Ensure your "Visitor" sticker is worn at all times and visible
- Clean your hands often and avoid touching anything you don't have to touch
- Go directly to the patients room

Face Coverings/Masks

- We encourage everyone to wear a face covering that covers your nose and mouth
- Face coverings must be worn at all times even if you are able to physically distance (6ft) when visiting

During Your Visit

- Only visit one patient. Do not visit other patients or go to clinical areas
- Stay in the patient room for the duration of your visit
- Do not leave the hospital with the patient, unless there is a courtyard on the unit you are visiting that you can use. Please ask the care team for permission to use the courtyard and a mask for the patient to wear
- Use public washrooms, not the patient washroom. Please speak with a member of the care team for directions to the closest public washroom
- Be respectful of your scheduled visit and leave on time. You may impact somebody else's visit if you overstay your time

After Your Visit

- Exit through the same door you came in
- Sign out at the screening desk when you leave the hospital
- Clean your hands

If you would like to connect with a patient more frequently please use our Virtual Visiting service—for more details, visit our website at www.haltonhealthcare.com

If you have any questions, please speak with a member of the healthcare team.

WEARING YOUR FACE MASK CORRECTLY

Please do not remove your mask unless you are asked to by a member of the health care team.

Avoid adjusting or touching the mask. If you do, clean your hands afterward.

DO make sure the mask covers your nose and mouth completely.

DO NOT wear your face mask on your neck.

DO NOT wear your face mask under your nose.

DO NOT hang your face mask off your ear.

Wearing your mask incorrectly can cause a greater risk of infection.
